Course information

Course prerequisites
The course assumes prior knowledge of finance, mathematics (algebra, optimization, stochastic calculi), and econometrics. It is designed for PiF students, but is also open to students from other PhD programs.

Course content
The course is a standard first-year PhD course in asset pricing, closely following in its structure Cochrane’s (2005) book Asset Pricing. It provides students with the theoretical foundations as well as the empirical methodology in asset pricing.

Course structure
The course consists of twelve sessions (of two academic hours each) and takes place in the first six weeks of the semester (before the semester break).

Course Outline:

(1) Optimal Consumption and First-Order Implications
(2) Complete Markets: the Turn to Incompleteness
(3) Factor Pricing Models
(4) Estimation and Evaluation
(5) Application
