1. **SAFETY INFORMATION**

Before beginning the installation and use of this appliance, carefully read the supplied instructions. The manufacturer is not responsible for any injuries or damages that are the result of incorrect installation or usage. Always keep the instructions in a safe and accessible location for future reference.

- Read the supplied instructions.

### 1.1 Children and vulnerable people safety

**WARNING!**

Risk of suffocation, injury or permanent disability.

- This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning the use of the appliance in a safe way and understand the hazards involved.
- Do not let children play with the appliance.
- Children aged 3 years and under must be kept away from this appliance when it is in operation at all times.
- Keep all packaging away from children and dispose of it appropriately.
- Keep detergents away from children.
- Keep children and pets away from the appliance door when it is open.
- If the appliance has a child safety device, this should be activated.
- Children shall not carry out cleaning and user maintenance of the appliance without supervision.

### 1.2 General Safety

- Do not change the specification of this appliance.
- If the tumble dryer is put on top of a washing machine, use the stacking kit. The stacking kit,
available from your authorized vendor, can be used only with the appliance specified in the instructions, supplied with the accessory. Read it carefully before installation (Refer to the Installation leaflet).

- The appliance can be installed as freestanding or below the kitchen counter with correct space (Refer to the Installation leaflet).
- Do not install the appliance behind a lockable door, a sliding door or a door with a hinge on the opposite side, that would prevent the appliance door from being fully opened.
- The ventilation opening in the base (if applicable) must not be covered by a carpet, mat, or any floor covering.
- WARNING: The appliance must not be supplied through an external switching device, such as timer, or connected to a circuit that is regularly switched on and off by a utility.
- Connect the mains plug to the mains socket only at the end of the installation process. Make sure that the mains plug is accessible after installation.
- Ensure good air ventilation in the located room to avoid the backflow of unwanted gases into the room from appliances burning gas or other fuels, including open fires.
- Exhaust air must not be discharged into a flue which is used for exhausting fumes from any appliances burning gas or other fuels.
- If the mains power supply cable is damaged, it must be replaced by the manufacturer, its Authorised Service Centre or similarly qualified persons to avoid an electrical hazard.
- Do not exceed the maximum load of 8 kg (refer to the "Programme chart" chapter).
- Do not use the appliance if items have been soiled with industrial chemicals.
- Wipe away lint or packaging debris that has accumulated around the appliance.
• Do not run the appliance without a filter. Clean the lint filter before or after each use.
• Do not dry unwashed items in the tumble dryer.
• Items that have been soiled with substances such as cooking oil, acetone, alcohol, petrol, kerosene, spot removers, turpentine, waxes and wax removers should be washed in hot water with an extra amount of detergent before being dried in the tumble dryer.
• Items such as foam rubber (latex foam), shower caps, waterproof textiles, rubber backed articles and clothes or pillows fitted with foam rubber pads should not be dried in the tumble dryer.
• Fabric softeners, or similar products, should only be used as specified by the product manufacturer’s instructions.
• Remove all objects from items that could be a source of fire ignition such as lighters or matches.
• Never stop a tumble dryer before the end of the drying cycle unless all items are quickly removed and spread out so that the heat is dissipated.
• The final part of a tumble dryer cycle occurs without heat (cool down cycle) to ensure that the items are left at a temperature that ensures that the items will not be damaged.
• Before any maintenance operation, deactivate the appliance and disconnect the mains plug from the socket.

2. SAFETY INSTRUCTIONS

2.1 Installation

• Remove all the packaging.
• Do not install or use a damaged appliance.
• Follow the installation instruction supplied with the appliance.
• Always take care when moving the appliance as it is heavy. Always use safety gloves and enclosed footwear.
• Do not install or use the appliance where the temperature can be less than 5°C or higher than 35°C.
• The floor area where the appliance is to be installed must be flat, stable, heat resistant and clean.
• Make sure that there is air circulation between the appliance and the floor.
• Always keep the appliance vertical when being moved.
• The rear surface of the appliance must be put against the wall.
• When the appliance is in its permanent position, check that it is fully level with the aid of a spirit level. If it is not, adjust the feet accordingly.

6. OPTIONS

6.1 Dryness (Trockengrad)
This option helps to achieve requested laundry dryness. Possible selections:

- - - - - - ready to iron - iron dry level.
- - - - - - ready to store - cupboard dry level - default selection which is related to the programme.
- - - - - - ready to store - cupboard dry + level.

- - - - - - - ready to store - extra dry level.

6.2 Anticrease (Knitterschutz)
Extends up to 120 minutes the anti-crease phase (30 minutes) at the end of the drying cycle. After drying phase drum rotates time to time what prevents the clothes from creases. Laundry can be removed during the anti-crease phase.
6.3 Refresh (Auffrischen)
To refresh clothes that were in storage. Maximal load cannot exceed 1 kg.

6.4 Time Dry (Zeitwahl)
For cottons, synthetics and mixed. Lets the user to set special time of drying program from minimum 10 min to maximum of 2 hours (in 10 min steps). When this option is on maximal load indication disappears.

6.5 Time Dry (Zeitwahl) on Wool (Wolle) program
Option applicable to Wool (Wolle) program to adjust final dryness level to more dry or less dry.

6.6 Delay Start (Zeitvorwahl)
Lets to delay the start of a drying program from minimum of 30 minutes to maximum of 20 hours.

1. Set the drying program and options.
2. Touch Delay Start (Zeitvorwahl) button again and again.
   Time of delay is on the display (e.g. 12 h if the program has to start after 12 hours.)
3. To activate Delay Start (Zeitvorwahl) option, touch the Start/Pause button.
   Time to start decreases on the display.

6.7 Buzzer (Signal)
The sound is heard at the:
- cycle end
- start and end of crease guard phase
The buzzer option is by default always on. You can use this option to activate or deactivate the sound.

7. BEFORE FIRST USE
Rear drum packaging is removed automatically when dryer is activated for the first time. Possible to hear some noise.

Before you use the appliance for the first time:
- Clean the tumble dryer drum with a moist cloth.
- Start a short programme (e.g. 30 minutes) with moist laundry.

8. DAILY USE

8.1 Preparing the laundry
- Close the zippers.
- Close the fasteners of duvet covers.
- Do not dry ties or ribbons loose (e.g. apron ribbons). Tie them before you start a programme.
- Remove all items from pockets.
- If an item has an internal layer made of cotton, turn it inside out. Make sure that the cotton layer is always facing outward.
- We recommend that you set a correct programme suitable for the type of fabrics that are in the appliance.
• Do not put dark colours together with light colours.
• Use a suitable programme for cotton, jersey and knitwear to prevent shrinkage.
• Make sure that the load do not exceeds the maximum load stated in programs chapter or shown on the display.

• Only dry laundry that is suitable for tumble drying. Refer to the fabric label on the items.
• Do not dry large and small items together. Small items can be trapped inside the large items and remain wet.

<table>
<thead>
<tr>
<th>Fabric label</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>☺</td>
<td>Laundry is suitable for tumble drying.</td>
</tr>
<tr>
<td>☺</td>
<td>Laundry is suitable for tumble drying at higher temperatures.</td>
</tr>
<tr>
<td>☺</td>
<td>Laundry is suitable for tumble drying at low temperatures only.</td>
</tr>
<tr>
<td>☺</td>
<td>Laundry is not suitable for tumble drying.</td>
</tr>
</tbody>
</table>

8.2 Loading the laundry

CAUTION!
Ensure the laundry is not trapped between the appliance door and rubber seal.

1. Pull open the appliance door.
2. Load the laundry one item at a time.
3. Close the appliance door.

8.3 Turning on the appliance

To turn on the appliance:

Push the On/Off (Ein/Aus) button. If the appliance is on, some indicators appear on the display.

8.4 Setting a program

Use the program dial to set the program. The possible time to complete the program comes into the view on the display.

The drying time you see is related to the load of 5 kg for cotton program. For the other programs the drying time is related to the recommended loads. The drying time of the cotton program with the load more than 5 kg is longer.
8.5 Options
Together with the program you can set 1 or more special options.

To activate or deactivate an option touch the relevant button or 2 buttons combination. When the option is activated, the LED above the button or symbol illuminates on the display.

8.6 Child lock option
The child lock can be set to prevent children from playing with the appliance. The child lock option locks all touch buttons and the program dial (this option does not lock the On/Off (Ein/Aus) button).

You can activate the child lock option:
• before you touch the Start/Pause button - the appliance cannot start
• after you touch the Start/Pause button - programs and option selection is unavailable.

Child lock option activation:
1. Turn the dryer on.
2. Select 1 of the available programs.
3. Touch and hold down 2 buttons at the same time.

The symbol appears on the display.

4. To deactivate the child lock, touch the above buttons again until the symbol disappears.

8.7 Starting a program

To start the program:

Touch the Start/Pause button. The appliance starts and the LED above the button stops flashing and stays on.

8.8 Program change
To change a program:
1. Push the On/Off (Ein/Aus) button to turn the appliance off.
2. Push the On/Off (Ein/Aus) button again to turn on the appliance.
3. Set a new program.

8.9 Program end
Clean the filter and drain the water container after each drying cycle. (See chapter CARE AND CLEANING.)

If the drying cycle is finished, the symbol appears on the display. If the Buzzer (Signal) option is activated, the acoustic signal sounds intermittently for 1 minute.

If you do not turn off the appliance, the anti-crease phase starts (not active with all programs). Flashing symbol signals the execution of the anticrease phase. Laundry can be removed during this phase.
To remove the laundry:

1. Push the On/Off (Ein/Aus) button for 2 seconds to turn the appliance off.
2. Open the appliance door.
3. Remove the laundry.
4. Close the appliance door.

9. HINTS AND TIPS

9.1 Ecological hints

- Spin the laundry well before drying.
- Do not exceed the load sizes which are specified in the programs chapter.
- Clean the filter after each drying cycle.
- Do not use fabric softener to wash and then dry. In the tumble dryer laundry becomes soft automatically.
- Use distilled water like that used for steam ironing. If it is necessary, clean the distilled water before (e.g. with a coffee filter) to remove any particles.
- Always keep the airflow slots at the bottom of the appliance clear.
- Make sure there is good airflow where the appliance is to be installed.

9.2 Adjustment of default dryness level

To change the default dryness level:

1. Turn the appliance on.
2. Select 1 of the available programs.
3. Touch and hold down the Dryness (Trockengrad) and Refresh (Auffrischen) buttons at the same time.

One of the symbols appears on the display:

- Maximum dryness
- Extra dryness
- Standard dryness

4. Touch the Start/Pause button repeatedly until you reach the desired dryness level.

9.3 Deactivating the tank indicator

The water container indicator is activated by default. It illuminates at the end of the drying cycle or during the cycle if the water reservoir is full. If the draining kit is installed the water container is drained automatically and the indicator can be deactivated.

To deactivate the indicator:

1. Turn the appliance on.
2. Select 1 of the available programs.
3. Touch and hold down Refresh (Auffrischen) and Time Dry (Zeitwahl) buttons at the same time.

One of 2 configurations is possible:

- the tank (Behälter) indicator: is on if the symbol appears - the water container indicator is permanently activated
- the tank (Behälter) indicator: is off if the symbol appears - the water container indicator is permanently deactivated
10. CARE AND CLEANING

10.1 Cleaning the filter

At the end of each cycle the filter (Sieb) symbol comes on the display and you must clean the filter.

The filter collects the fluff during the drying cycle.

1. Open the door. Pull the filter up.

2. Push the hook to open the filter.

3. Use a moist hand to clean both parts of the filter.

4. If necessary, clean the filter with a vacuum cleaner. Close the filter.

5. If necessary, remove fluff from the filter socket and gasket. You can use a vacuum cleaner. Place the filter back inside the filter socket.

10.2 Emptying the water container

Empty the condensed water container after each drying cycle.

If the condensed water container is full, the programme stops automatically. The tank (Behälter) symbol comes on the display and you must empty the water container.

To empty the water container:

1. Pull the water container out keeping it in a horizontal position.

2. Pull the plastic connection out and drain the water into a basin or equivalent receptacle.
3. Push the plastic connection back in and place the water container back into position.
4. To continue the programme press the Start/Pause button.

10.3 Cleaning the condenser

If the symbol \(\rightarrow\) condenser (Kondensator) flashes on the display, inspect the condenser and its compartment. If it is dirty, clean it. Do the check not less than once a 6 months.

⚠️ WARNING!
Do not touch the metal surface with bare hands. Risk of injury. Wear protective gloves. Clean carefully to avoid damaging the metal surface.

To inspect:

1. Open the door. Pull the filter up.
2. Open the condenser cover.
3. Turn the lever to unlock the condenser lid.
4. Lower the condenser lid.
5. If necessary, remove the fluff from the condenser and its compartment. You can use a wet cloth and/or a vacuum cleaner with a brush attachment.
6. Close the condenser lid.
7. Turn the lever until it clicks into position.
8. Put the filter back.

10.4 Cleaning the drum

**WARNING!**
Disconnect the appliance before you clean it.

Use a standard neutral soap detergent to clean the inner surface of the drum and drum lifters. Dry the cleaned surfaces with a soft cloth.

**CAUTION!**
Do not use abrasive materials or steel wool to clean the drum.

10.5 Cleaning the control panel and housing

Use a standard neutral soap detergent to clean the control panel and housing.

Use a moist cloth to clean. Dry the cleaned surfaces with a soft cloth.

**CAUTION!**
Do not use furniture cleaning agents or cleaning agents which can cause corrosion to clean the appliance.

10.6 Cleaning the airflow slots

Use a vacuum cleaner to remove fluff from the airflow slots.
