Master of Arts in Strategy and International Management (SIM)

The Flagship Management Programme for Tomorrow’s Responsible Global Leaders
Outstanding Management Education

With a challenging curriculum that combines the research-based, academic rigour of a Master of Arts with the practice-oriented approach of leading MBA programmes, the SIM offers an outstanding management education.

Insightful International Journeys

The SIM programme encourages and enables you to supplement your academic curriculum with meaningful international experiences. You will embark on an international internship, a social initiative abroad, and benefit from unparalleled access to exclusive double degree and exchange opportunities worldwide.

Excellent Career Prospects

The SIM prepares you for a successful career in management positions, consulting, financial services or entrepreneurship. It is common for students to have more than one attractive offer to choose from before graduation, with top starting salaries by international standards.

Global SIM Community

As a SIM student, you will be part of a strong, diverse and dynamic global community with about 900 members from over 60 countries comprising students, alumni, staff and faculty. The SIM is a tight community where one can proactively reach out for help or advice on professional or personal matters.
Welcome from the President

Promoting integrative thought in business and society, inspiring people to act in an ethical and socially-responsible manner: these are the goals we strive for in educating tomorrow's leaders at the University of St.Gallen. The Master of Arts in Strategy and International Management (SIM) incorporates these objectives and values in a unique way, by combining theoretic foundations in management, case work, and hands-on social impact projects. By joining the SIM community, you will share the classroom with the most talented, visionary, and driven students from all around the world. At our University, a huge diversity of student initiatives will provide you with opportunities to organize events, meet inspirational people, make friends for life—and shape the campus of tomorrow. We look forward to having you here!

Prof. Dr. Bernhard Ehrenzeller,
President of the University of St.Gallen
Our Vision

By being admitted into the Master of Arts in Strategy and International Management (SIM), you are part of a leading programme which strives to provide outstanding management education and generate exceptional value for students, employers and society at large.

Outstanding Management Education

It is our mission to provide you with the advanced knowledge and skills of management for a successful career as a respected and responsible manager, entrepreneur, business consultant, and beyond. We offer an integrative and interdisciplinary learning experience, since only an approach of this nature is capable of conveying the ability to cope with the complex management challenges of our time. Our programme aspires to act independently of all interests and is committed to uphold high ethical and academic standards.

Flagship Master’s Degree Programme

As a SIM student, you are part of a diverse group of highly motivated and ambitious individuals. You stand out through your strong track record, your eagerness to learn and develop key competencies, and your aspiration to grow into a responsible global leader. Thanks to our small class, you can interact with an experienced faculty that combines academic rigour with managerial relevance, whilst experiencing a high level of cultural diversity. The University of St. Gallen is well known for its integrated management framework, which forms the heart of teaching in the SIM Master’s degree programme. By way of international projects, challenging initiatives dedicated to finding creative solutions to address social needs, as well as multiple exchange and double degree opportunities available around the globe, you will be challenged to leave your comfort zone, perform and excel.

Exceptional Career Prospects

At the SIM, your efforts are rewarded with excellent prospects in the job market. You benefit as well from the University’s close ties to leading international companies, business leaders, and access to the nearly 29,000 active alumni around the globe.

An Inspiring Community

Furthermore, you become an active member of our programme’s most unique feature: a lively and enthusiastic SIM community. Based on joint initiatives, the SIM Directorship and Management Unit, together with its Faculty, committed students and graduates, strive to create a social environment that allows for much more than just participating in a top-ranked educational programme year after year. We look forward to welcoming you to the SIM Master’s degree programme at the University of St.Gallen.

The Directorship Team

Our Journey

The Master in Strategy and International Management (SIM) programme was founded in September 2004. The journey has been rewarding: a story of unprecedented success, shaped by the values of our tight-knit global community.

September 2004
A group of twenty-one bright and ambitious management students gathers at the University of St.Gallen, Switzerland. For the very first SIM class, this is the start of a life-changing adventure: a learning experience fuelled by the power of imagination, dedication, and collaboration.

September 2009
The inaugural projects of the SIMagination Challenge course are launched by the sixth SIM generation. This course is an essential curricular pillar of the SIM programme, where students are required to embark on challenging projects around the world, aimed at leaving a positive and sustainable social impact in our society. As of 2020, a total of 79 initiatives have been carried out by SIM students worldwide.

September 2010
The SIM participates in the Financial Times Global “Master’s in Management” ranking for the first time and is awarded 4th position.

September 2020
The SIM is ranked #1 for an unparalleled tenth consecutive time by the Financial Times’ Global Masters in Management Ranking and completes a decade of being the leading programme worldwide.

May 2019
The SIM global community comes together in St.Gallen to celebrate the fifteenth anniversary of the programme. Over 135 SIM alumni and students attend the event, with 12 out of 15 generations of SIMmies represented.

...and our journey continues...
SIM-Start Professional

The compulsory integrative week of the programme prepares you for the start of your studies and helps you maximize your success during your SIM experience. The week comprises a selection of seminars that focus on distinct topics of high managerial relevance that will prepare you for your regular studies at the SIM. Additionally, the week serves as a social networking opportunity with your peers.

Personal Mastery

A key feature of the SIM programme is its small class-size, which facilitates individual attention. Several courses, such as the SIM Integratives, are limited to 30 participants, thereby creating a high level of intensity in the interactive teaching. You will thus benefit from an environment that allows for interaction with the staff, the faculty as well as with mentors and other stakeholders. Moreover, various learning experiences are designed to include personal reflection and individualised feedback.

A Challenging Curriculum

Your SIM curriculum consists of 90 ECTS and is typically three semesters (1.5 years) in duration. It builds upon the core disciplines of strategy, leadership, finance, marketing, organisational behaviour and international management. Advanced courses in these majors are complemented by a selection of SIM Integratives, which allow you to explore sizeable management challenges of our time by taking a holistic approach to the relevant management disciplines.

In the mandatory pillar “SIM in Practice”, consisting of the SIM International Project (SIM-IP) and the SIMagination Challenge course, we give you the opportunity to apply what you have learnt in the classroom to both corporate practice and international initiatives.

On account of our global orientation, the language of instruction and examination of the SIM programme is English. Upon successful completion of the programme, you will be awarded the Master of Arts in Strategy and International Management (SIM-HSG).

Our Commitment

As a SIM student, you benefit from excellent graduate-level education in Strategy and International Management, and experience a unique blend of academic coursework and complex practical goals. The curriculum is enriched by opportunities for personal development and enables you to sharpen the skills required of a future global leader.

The interdisciplinary curriculum of the SIM encompasses intelligence, broad sympathy, scientific literacy and practical value. It equips us with tools to figure things out on our own and even a chance to trust in our aptitude to deliver extraordinary results required to have a strong social impact. Most notably, the programme focuses on our professional and personal growth, communication, interpersonal effectiveness and ability to solve complex assignments.

Jurij Besednjak, SIM13 (2016 intake), Slovenia (walking right)
Profile of a SIM Student

If you identify with these traits, you are on the right path to becoming a member of this engaged community.

Global Mindset
You possess a high level of intercultural awareness. Your life experiences allow you to embrace more than just your own cultural background and you are both able and willing to consider different perspectives on any given subject.

Critical and Creative Thinking
You are capable of critically reflecting upon complex topics. You enjoy finding creative, novel ways to approach the analysis of context and content, identify solution paths, and corresponding explanations.

Analytical Aptitude
You have a proven ability to effectively solve problems, which you can demonstrate through your outstanding achievements in various areas.

Self-Reflection
You have reflected upon your life, background and experiences, and are aware of your own strengths and weaknesses. You constantly discern your developmental needs and you are highly motivated to address them.

Maturity and Integrity
You are a mature, well-balanced individual, who has developed through meaningful experiences and learnings in different contexts. You are engaged in activities for your peers, community and society at large.

“A SIMmie is open-minded, adventurous, adaptable, humble, and curious. To me, the SIM is so much more than a Master’s programme. It feels like being part of a family with members from different countries, sharing an unbelievably strong bond, a feeling that will not change when we graduate.”

Kirsimarja Säkkinen, SIM13 (2016 Intake), Finland (sitting left)
The Best of Both Worlds

The SIM curriculum unites the best of both worlds. It combines the research-based, academic rigour of a Master of Arts with the interactive nature and practice-oriented approach present in leading MBA programmes. It reflects the confidence we have in your abilities and potential.

SIM Compulsory Courses
These courses advance your knowledge in the functional areas of management. You will explore advanced theories and concepts, examine managerial practice and engage in scientific discussions.

SIM Core Electives
The SIM core electives consist of Advanced Management Courses and Integratives. The latter focus on subjects of widespread and current interest in the field of management. Multidisciplinary perspectives are needed in order to embrace these subjects and explore ways to successfully cope with the most current management challenges.

The SIMagination Challenge
The first element of the mandatory “SIM in Practice” pillar consists of an innovative approach to spur advanced learning by planning, executing and reflecting upon a challenging project which aims at leaving a positive and sustainable impact on society. This course allows your team to initiate an international project, first by carefully identifying and analysing social needs and then by developing effective and sustainable solutions to address these challenges in the long term. The course explores topics such as personal mastery, team diversity, strategy execution and social responsibility. All of these areas need to be strongly understood by responsible business leaders of the 21st century.

SIM International Project
The “SIM in Practice” pillar also requires you to engage in a challenging international internship that you independently plan, complete and reflect upon.

Independent Electives
You may choose from a range of different Independent Electives offered both by the SIM programme and other Master’s degree programmes. Thus, you will have the opportunity to acquire additional knowledge in specific fields of interest.

Contextual Studies
Contextual Studies are a particular feature of the HSG degree course architecture. They enable you to complement and reflect upon your core studies from various perspectives. You will learn that economic decisions are always embedded in general societal, cultural and historical conditions and must therefore be viewed from an integrative angle. The eight Areas of Concentration are: media, cultures, history, society, responsibility, creativity, law and technologies.

Master’s Thesis
In order to complete the Master’s degree, you must write a thesis worth 18 ECTS credits. The topic of the Master’s Thesis may derive from any constituent of the SIM programme. You are encouraged to write your thesis in an area relevant to practice.
**SIM Curriculum Overview**

**Personal Mastery**

**SIM International Project** 6 ECTS

- **Integratives** 8-20 of 24 ECTS
- **Mergers & Acquisitions** 4 ECTS

International Double Degree and Exchange Programmes

Whether doing an exclusive SIM-MBA double degree, a double degree programme offered by the University of St.Gallen or an exchange term at a partner university, the international exchange programmes are available to fit a wide spectrum of your educational and intercultural goals.

Exclusive SIM-MBA Double Degree Programmes

INCAE Business School - MBA

The SIM and INCAE MBA double degree programme allows you to enrich your studies with a Latin American perspective. You will receive a Master of Business Administration (MBA) in combination with the SIM Master’s degree in two years. Studying at the INCAE MBA prepares you for the challenging business world at the interface of developed and emerging countries. This double degree is the ideal path if you wish to start your management career, distinguishing yourself with the unique Latin American perspective and focus on sustainability. INCAE Business School is the leading business school in Latin America (Financial Times 2019).

Nanyang Business School - MBA

This prestigious double degree provides you with the unique opportunity to gain both Asian and European perspectives on business. You simultaneously earn an MBA at Nanyang Business School (NBS) in Singapore and the SIM Master’s degree at the University of St.Gallen. Situated in Asia’s most liveable city, the Nanyang MBA is an intense global MBA with a focus on Asia. While in Singapore, you have the opportunity to specialise in Strategy and Innovation or Banking and Finance. The Nanyang MBA was ranked 30th globally by the Financial Times (2019).

International Master's Double Degree Programmes

DM2 Double Degree Programmes

A double degree gives you the opportunity to be challenged further while experiencing another culture in depth and earning a second Master’s degree from one of the partner institutions: ESADE, Barcelona, Spain | HEC Paris, France | RSM Erasmus University, Rotterdam, Netherlands

FGV-EAESP Double Degree Programme

Within approximately 2.5 years, you can complete a second degree from FGV-EAESP (Fundação Getulio Vargas, Escola de Administração de Empresas de São Paulo), the most renowned school of economics in Brazil.

CEMS MIM

CEMS is a global alliance of 32 leading business schools, collaborating with multinational companies and NGOs that together offer the CEMS Master’s in International Management. The CEMS MIM builds a bridge between university education and practical management, thus offering you profound insight into leadership best practices.

International Exchange Term

The HSG has an extensive partner network with over 200 universities worldwide. As a SIM student, you may choose to spend an exchange term abroad at universities such as: Stockholm School of Economics | Università Commerciale Luigi Bocconi, Milan | Freie Universität Berlin | Tsinghua University, Beijing | Indian Institute of Management, Bangalore | Nagoya University of Commerce & Business | University of Witwatersrand, Johannesburg | American University of Beirut | Duke University, Durham (GA) | UCLA University of California at Los Angeles | New York University | Universidad de los Andes, Bogota | Universidad San Andres, Buenos Aires
The goal of the SIM Career Concept is to increase your employability and for you to make informed and conscious career decisions that are true to your personal values. As a SIM student, on top of the generic offering of the Career Services at the University of St. Gallen, you can benefit from a series of employability-enhancing workshops, one-to-one coaching sessions and career insights from the community. The SIM programme has developed an exclusive Career Concept based on the three following pillars.

**Step Back: Creating Space for Self-Reflection**

We believe that reflecting on your values, interests and choices is of utmost importance for you to take meaningful decisions in the future. The SIM provides a space for self-reflection on your career planning by offering, for instance, one-to-one advising sessions. Moreover, gaining a strong understanding of different career paths is a crucial part of the reflection process. The SIM Career Teatime evenings with alumni are events where community members discuss their career decisions and what ultimately drove them to a specific industry. These insights help students understand how different careers might look like and how these fit their interests.

**Lean Forward: Enhancing Employability Relevant Skills**

Complex problem solving, effective communication and emotional intelligence are some of the necessary skills to strive in today’s business environment. The SIM provides carefully chosen workshops that enable you to enhance these skills. Additionally, workshops with corporate partners give you a chance to work on practical scenarios through challenging case studies. Besides the extensive offering of language courses at the University of St. Gallen, the SIM offers an intensive German language programme to further increase your employability in the German speaking part of Europe.

**Run: Relevant Job Search Support**

We believe that relevant job support can enable you to unleash your full potential. The SIM Career Services offer group sessions and individual coaching to support you in creating solid application documents for specific positions and to provide guidance in preparing yourself for the interview process. While each student is in charge of their own job search and career planning, you are given a range of opportunities to acquire the necessary skills that help you achieve your professional goals.
Excellent Career Prospects

The SIM prepares you for a successful career in top management positions in consulting, financial services, venture capital, healthcare, industry, or entrepreneurship, to name a few. It is common for students to have more than one offer to choose from before graduation with top average starting salaries.

“The SIM provides countless opportunities to learn about and discover different career paths – via assignments, internships, workshops with relevant companies or informal conversations with SIM community members. You can get unbiased insights and information on all kinds of industries and career paths firsthand.”

Luisa Kascikke, SIM13 (2016 intake), German, currently working for Danone

“The different aspirations and backgrounds of my fellow students and the experience of the SIMagination Challenge incited me to re-evaluate my career plans. The SIM Career Services guided me to reflect on what I wanted to achieve and how I could get there, rather than focusing on which employer I wanted to have.”

Morgan Lyhøi, SIM14 (2017 intake), Danish, currently working for BCG Denmark

“Before the SIM, I did not realise the scope of opportunities that lay ahead of me. With the strong support of the SIM ecosystem, I not only discovered the international career options I could strive towards, but I also learnt about myself, my strengths and my potential.”

Dina Narendrasona, SIM14 (2017 intake), Russian, currently working for the Merck Group

Career & Corporate Services

The Career & Corporate Services provide support for all students at the University of St.Gallen, offering workshops, counselling and application support. They organise a number of recruiting events with companies on campus, such as the HSG TALENTS Conference, HSG Consulting Days, HSG Banking Days and HSG Industry Days. The HSG TALENTS Conference is the largest recruiting event in Switzerland for business and law students and takes place in March every year over a period of three weeks. More than 100 companies visit the campus to meet students, which provides a unique opportunity to interact with prospective employers during company presentations, workshops, pre-scheduled interviews and a career fair.

www.hsgcareer.ch www.hsgtalents.ch

Corporate Partnerships

SIM Corporate Partners

SIM Selected Practice Partners

Employers (Alphabetical order)
Global SIM Community

As a “SIMmie”, you become part of a strong, diverse and dynamic community. Our global community comprises all students, graduates, staff and faculty members of the SIM programme. It is shaped outside the classroom through regular events, international networking and social media. The SIM community has immense value as it is a tight community where one can proactively reach out for help or advice on professional or personal matters.

SIM Buddy System
As a newly admitted student, you have the chance to be assigned a current SIM student as a peer mentor. Your SIM Buddy can assist you in tackling many of the challenges you may face when preparing to move to Switzerland and to study at the University of St.Gallen.

SIMopoly
This icebreaker event that takes place during the SIM-Start Professional has become a tradition, actively introducing you to your classmates’ unique personalities. SIMopoly focuses on building collaboration within diverse groups, friendly competition, and creative problem-solving – all of which are themes of the SIM programme. Your team will be led by previous SIM students along a treasure hunt trail, while getting acquainted with the city of St.Gallen.

Regulars’ Tables
At the SIM Regular’s Tables, your class will find a space to define its own identity. These are regularly organised events with specific cross-cultural themes that serve as social networking opportunities between SIM students, SIM staff and members of the SIM faculty.

SIM Community Events
Regularly, members of the SIM community come together for an exclusive and interactive event. This constitutes the perfect forum to catch up with the whole SIM community, make new connections and strengthen your bonds with other SIM colleagues. The latest community event took place in St.Gallen to celebrate the fifteenth anniversary of the programme.

Social Media Groups
The community groups on Facebook and LinkedIn provide virtual platforms for the SIM community to connect, to share the latest updates about the programme and to share job opportunities. Along with the SIM community events, social media groups allow the community to stay closely connected.

SIM Community Hubs
SIM Community Hubs exist in different cities around the world and provide a platform for SIM alumni to organize regional events and to network. SIM Community Hubs also serve as a great resource for SIM students if they go on exchange or do an internship in a city where a Hub is established.
Learning Experience

The University of St.Gallen aims to develop you both professionally and personally by providing you with an education grounded in the humanities. Among the University’s general principles is the promotion of interaction between faculty and students in an environment characterised by diversity and synergetic development of regional and international roots. You can witness first-hand its international orientation thanks to students and faculty coming from all continents, its collaboration with around 200 partner universities, and its active membership in international networks.

“From Insight to Impact”

Our University is more than an educational institution; it is a place of inspiration that stimulates you to think. You will acquire up-to-date knowledge that is of great practical relevance, and gain valuable insights. This will enable you to make an important contribution to social and economic progress and to your own personal development.

Ranking and Accreditations

According to current rankings, the HSG is one of Europe’s leading business universities. Its holistic education of the highest academic standards has earned it the EQUIS, AACSB and AMBA accreditations.

Unique Academic Structure

Intellectual skills, an integrative view, flexibility, responsibility and intercultural qualifications are of ever increasing importance today. To ensure that students are able to acquire these skills, we have a unique degree course architecture at the HSG.

Core Studies

Core studies at the University of St.Gallen consist of compulsory subjects, core electives, electives and the Master’s Thesis. The compulsory subjects convey the basics of the degree course of your choice. Core electives consist of a wide range of programme-specific courses. Courses of other programmes are open to you among the electives. The extensive range of core electives and electives enables you to focus on issues which may be of particular interest to you.

Classroom and Independent Studies

In Contact Studies, the subject matter is communicated by a teacher in lectures, exercises and seminars. A further form of teaching is Independent Studies: you learn on your own or in small groups, using various aids. This is a more extensive concept than preparatory or follow-up work on lectures. In Independent Studies, you hone your ability to acquire knowledge on your own. The advantage is that you are free to schedule your own learning time.
**Contextual Studies**

Contextual Studies at the Master’s enable you to study relevant issues with a multidisciplinary approach and in depth: media, cultures, history, society, responsibility, creativity, law and technologies. These eight Areas of Concentration provide you with an opportunity to acquire more detailed qualifications.

Alternatively, you can thematically combine two seminars from Contextual Studies with a core studies course you have already completed and achieve an intensively supervised and innovative synthesis in a portfolio course. Courses in Skills, for instance, include rhetoric and programming. In addition, the University of St.Gallen fosters discourse with different countries and other cultures: you can gain international experience in dialogues with students from more than 80 nations.

**Research**

With a research culture that prizes excellence and is fully committed to academic freedom, research at the University of St.Gallen is centered around research institutes and centres, which are an integral part of the HSG and operate at a largely autonomous level. They combine theory with practice, provide important input for teaching at the University and play a significant role in furthering the careers of young academics.

**Startup@HSG**

Startup@HSG aims to enhance entrepreneurial spirit among students. It presents you with different perspectives of entrepreneurship, as well as supports technological and knowledge intensive projects at HSG. Apart from numerous events throughout the year, Startup@HSG may organise individual consultations with specialists. Additionally, a scholarship programme was set up, providing future founders with working space, mentoring and financial support. Other initiatives, such as the HSG Founder of the Year prize, as well as the Social and Sustainable (SnS) Ventures in cooperation with the University of Zurich, are part of the vast offering.

**The St. Gallen Symposium**

The St.Gallen Symposium is said to be the world’s premier opportunity for debate across generations on issues of management, politics and civil society. First launched in 1970 and organised entirely by students, the Symposium aims to foster intergenerational and intercultural dialogue between the leaders of today and the leaders of tomorrow. Annually, 200 talented young people from across the world are invited to attend. The St.Gallen Foundation for International Studies is an independent foundation supervising the activities of the International Students’ Committee (ISC) St.Gallen in the organisation of the St. Gallen Symposium.

symposium.org

*Kofi Annan, former UN Secretary General, 2001 Nobel Peace Prize laureate*

"St.Gallen provides a setting which marries the promise of the future with the foundations of traditions – and is an absolutely essential link between academic work and the practical world."
“Living in St. Gallen has been a very rewarding experience. The town being relatively small, it confers a cozy atmosphere and allows us students to frequently meet up wherever we live. But what makes St. Gallen really special is its beautiful scenery. Located in between Lake Constance and the Alps, you are not far from a nice swim, or a fondue in a skiing hut.”

Karim Bugglé, SIM13 (2016 Intake), France/Germany

St. Gallen is a historically unique town with a variety of shops, street cafés, bars and clubs, and with approximately 75,000 inhabitants. The Abbey District holds international significance with its baroque cathedral and the Abbey Library, which is a UNESCO World Heritage Site.

Switzerland

As a federal republic with a system of direct democracy, Switzerland enjoys a high degree of political stability. Living here means being close to various international organisations, such as the United Nations and the World Trade Organization. The country’s economy is based on a highly qualified and skilled labour force. Switzerland’s international reputation as a research centre is beyond dispute. Primary industries include micro-, high- and biotechnology, pharmaceuticals, as well as banking and insurance. Swiss companies are extremely competitive in the global markets. Due to all these factors, as well as its beautiful landscapes, you will soon be conquered by the high standard of living at affordable prices.

Living in St. Gallen

St. Gallen is a vibrant and dynamic cultural town, where performances in the city theatre, the concert hall, local cultural festivals, as well as exhibitions in numerous museums and private galleries are extremely regular. An event that is particularly popular with many students is the Open Air St. Gallen, a music festival during which the Sitter Valley is transformed into Switzerland’s largest tent city for four days. Additionally, you will have the opportunity to keep fit with varied leisure and sports activities, such as skiing, rock climbing and sailing due to the city’s great location between the snowy Alps and sunny Lake Constance. The Peter and Paul Wildlife Park, close to the University, is an idyllic setting for jogging or walking. Furthermore, St. Gallen’s “Three Ponds” are only a few minutes’ walk from the city centre. These three large ponds, situated on the outskirts of the city, serve as public swimming pools in the summer and as ice rinks in cold winters.

Preparation for Settling in St. Gallen

As an international student, you must obtain a visa prior to entering Switzerland, unless you are a national from the EU/EFTA area, Japan and Singapore, in which case you must only apply for a residence permit. On average, visa applications take about eight weeks to process. You can apply for your visa as soon as you have received your letter of acceptance from the University and have secured financing for your studies. Information on such procedures is offered by the HSG Admissions and Crediting Office.

Highlights

– The Abbey District in St. Gallen, UNESCO World Heritage Site
– Switzerland’s four national languages: German, French, Italian and Romansh
– Large international population (28.7% foreign nationals)
– St. Gallen is very well connected to Zurich airport (1 hour by train) and is located in the heart of Europe
Financing Your Studies

Higher education is subsidised by the Swiss government, resulting in low tuition fees, which makes the SIM an affordable programme among the world’s top-ranked institutions. A degree is an investment in your personal development and your future, which should enable you to recover your tuition fees after the first few months of employment.

Tuition Fees
Switzerland invests in excellent undergraduate and graduate education by way of government subsidies. Thus, as an international student, your tuition fee at the University of St. Gallen is a favourable amount of CHF 3,329 per semester (not including text books and other teaching material). Payments are made by semester.

Living Costs in St. Gallen
The recommended monthly budget is between CHF 2,100-2,500 per month for basic needs, including living and studying expenses. Estimated monthly expenses:
- Housing: CHF 660
- Living expenses: CHF 1,120
- Health (insurance, medication, etc.): CHF 170

Travelling
In Switzerland, travelling by public transport is very convenient and encouraged. You are advised to obtain the Swiss Federal Railway half-fare (Halbtax) card in order to save 50% on all tickets. It is available for about CHF 185 and is valid for one year.

Work-Study Opportunities
The University and its institutes are regularly looking for students to do project work. The SIM Management Unit also offers projects to students of the SIM programme. Vacancies can be found on the website of the HSG, the HSG institutes and the Career & Corporate Services. International students are allowed to work 15 hours per week. Students from outside the EU/EFTA area need a work permit in order to work in Switzerland.

Financial Aid
When studying in Switzerland, you can take up a temporary part-time job and/or apply to secure a student loan or scholarship. Financial aid for studying in Switzerland can be obtained from various sources. Specifically, two funds are made available by the HSG:

- Loan and Scholarship Fund
  To ensure financially disadvantaged students are also able to study at the HSG, we have the loan and scholarship fund. The fund offers loans and scholarships to students enrolled in the Bachelor’s or Master’s Level. Additionally, foreign students can be granted a scholarship that covers the difference between the fees for Swiss nationals and foreign nationals. The purpose is to support students in need. To be eligible to apply for either form of aid, students must be enrolled for a minimum of one semester. www.studyfunding.unisg.ch

- Starr International Foundation Scholarship Fund
  The Starr International Foundation Scholarship Fund is set aside for highly talented foreign-language students with a recognised foreign Bachelor’s degree who are completing a Master’s degree in one of the English-language programmes. Exceptional students are identified by the Advice Center for Study Funding and asked to hand in an application. Please check the website of the Advice Center for Study Funding for further information on the above-mentioned or other options. www.studyfunding.unisg.ch

Other Scholarship Opportunities
A limited amount of scholarship opportunities, such as the WEF Global Shapers Scholarship and the Kistefos St. Gallen Masterclass Scholarship (for Norway), may be available to SIM candidates every year thanks to our strong network of strategic partners. During your application process, we can advise you on your potential eligibility for any of these initiatives. www.globalshapers.org
www.stgallen.no
