

## Proof of entry level requirements

The PEcon courses build on prior knowledge in core areas, which is generally attained by a competitive master's degree programme in Economics and Finance. Applicants therefore need to prove entry level knowledge in the main fields which are relevant to their desired specialisation. If the submitted information or the material covered in similar master courses taken at home university is insufficient, then the student will have to take these additional courses.

Detailed information about master's courses taken at home university which are similar to the courses listed below (content of the courses, number of ECTS credits, reading lists, type of examination, etc.), should be uploaded in a [single PDF file](#).

Please provide detailed information especially regarding the "Course content" section in the Course Factsheets available at the links below.

**Please note that if the submitted information is not complete, a later request will not be considered, and the Programme Committee will not revise their decision. The student will have to take the entry level courses as decided by the Programme Committee.**

**Economics** specialization:

- [7,252: Advanced Microeconomics I: Consumers, Firms, Markets](#)
- [7,250: Advanced Macroeconomics I: Growth and Innovation](#)
- [8,300: Data Analytics II: Causal Econometrics](#).

**Econometrics** specialization:

- [8,300: Data Analytics II: Causal Econometrics](#)
- [7,252: Advanced Microeconomics I: Consumers, Firms, Markets](#) and [7,250: Advanced Macroeconomics I: Growth and Innovation](#), *or* [7,315: Theory of Finance](#) and [8,302: Advanced Mathematics and Statistics](#).
