What is Rosetta Stone®?

Rosetta Stone® Catalyst is an online language course with a high degree of entertainment, allowing students to indulge in a new language.

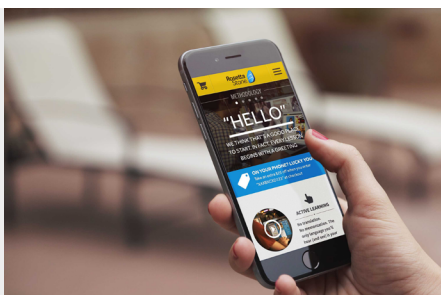

The international success of the Rosetta Stone® method comes from the fact that it allows even students with little preknowledge to find an entry into a new language. Even after just a short period of time, students are able to understand words and sentences and to intuitively apply these in practical communication settings.

Intuitive System of Learning

New vocabularies are introduced using carefully chosen images and these language building stones are then combined and expanded into ever more complex combinations - altogether without using translations! Intuition and the ability to combine are being challenged, so that the learned subjects are committed to memory, quickly and for the long run. The learning software also has a sophisticated speech recognition, with which it is possible to practice and improve pronunciation of words and sentences.

Mastering Learning Tasks Using Voice

In many practice sessions, the program asks students to try out and apply what they have just learned, using the microphone. As a result, students quickly become accustomed to master learning tasks, not just using the cursor but also using their own voice. Especially with languages with an unfamiliar pronunciation and intonation, the language lab can be of immense value.

Do you want to learn on the go?

With Rosetta Stone®, it is possible to study using a tablet or a smart phone, in addition to the computer. The app required for this can be downloaded for free from the Apple Store or Google Play and activated right away by previously registered students.

Rosetta Stone® Foundations

The first part of Catalyst is called Rosetta Stone® Foundations. The Language Center of the University of St.Gallen is giving students the opportunity to obtain a license for the online language course Rosetta Stone® Catalyst at a reduced price. With our license, you will gain full access to all the 24 languages available.

Who is Rosetta Stone® Foundations for?

Rosetta Stone® Foundations introduces you to the language of your choice (see list below) and guides you up to level B1 of the CEFR. We are pleased to needlessly give you access to Rosetta Stone® Fluency Builder, once you reach the end of the learning path. Just write us a short e-mail. If the language you are learning is provided by Fluency Builder, the software will guide you all the way up to a professional language level (C1 or C2).

What makes Rosetta Stone® Foundations so special

It's the deliberate avoidance of translations, vocabulary lists, as well as grammar lessons that distinguishes this language program from others. Instead, the program focuses on images, audio examples, and interactive exercises. This allows you to playfully learn and train many new words, expressions, and sentence structures in the new language.

Which languages can you learn with Rosetta Stone® Foundations?

- Arabic
- Chinese (Mandarin)
- Dutch
- English (US)
- English (Brit.)
- French
- German
- Greek
- Hebrew
- Hindi
- Irish
- Italian
- Japanese
- Korean
- Persian (Farsi)
- Polish
- Portuguese (Brazil)
- Russian
- Spanish (Latin America)
- Spanish (Spain)
- Swedish
- Tagalog (Philippines)
- Turkish
- Vietnamese

Rosetta Stone® Fluency Builder

With Rosetta Stone® Fluency Builder you can increase your language skills up to a professional level in a most attractive learning environment.

Rosetta Stone® Fluency Builder is the second part of the Rosetta Stone® Catalyst License. It is designed to deepen the languages listed below to a professional level in a varied and engaging way. This makes it the ideal supplement to the advanced language courses from GER level B2 to C2 of the University of St. Gallen.

Who is the Rosetta Stone® Fluency Builder for?

While the relaxed, varied nature of the Rosetta Stone® Foundations is also felt in Fluency Builder, the tutorial has been supplemented with grammatical explanations and exercises, adding considerable depth.

What makes the Rosetta Stone® Fluency Builder special?

Rosetta Stone® Fluency Builder is a browser-based software, which was programmed in a responsive design, which means that you can learn languages wherever you want, be it at home with your computer, on the bus with your smartphone or on the train with your tablet. As long as you have at least a headphone or a headset with microphone, there are no limits to your learning pleasure.

Which languages can you learn with Rosetta Stone® Fluency Builder?

- German
- English (Brit.)
- English (US)
- French
- Italian
- Spanish (Spain)
- Spanish (Latin America)
